HEALTH AND REHABILITATION CENTER

Caring for life.®

St. Camillus Health and Rehabilitation Center has a long standing history of services to persons in the Central New York area who have acquired a brain injury. Our Inpatient Brain Injury Rehabilitation unit opened in 1990 and remains the only certified inpatient Brain Injury Rehabilitation unit in the area. St. Camillus also offers therapy, counseling and case management through its Brain Injury Rehabilitation Program in our outpatient clinic.

As part of our continued commitment to serving persons with a Traumatic Brain Injury, St. Camillus began providing services through the Department of Health TBI Waiver in 2008. Although waiver services are new to St. Camillus, it is not new to the people working in our program. All of St. Camillus' Rehabilitation Services are overseen by an administrator who began working with individuals with a Traumatic Brain Injury as a TBI Waiver Service Coordinator in 1996. The St. Camillus TBI Waiver Program professionals have knowledge and experience about the systems, supports and services in the community, and through the TBI Waiver, designed to meet your goals and needs.

St. Camillus offers TBI Waiver Service Coordination, Independent Living Skills Training, Community Integration Counseling and Positive Behavioral Intervention and Support services in Onondaga and Oswego Counties. We approach each person with an eye towards their unique circumstances and work with them to create an individualized plan aimed at reaching their goals. Our purpose is to assist each person to reach their goals through arranging the supports and services needed to increase their independence and maintain their life in the community. Our success shall be the success of each participant in their achievement of a self-directed independent life within the community.

We welcome the opportunity to discuss your desires, goals and needs and how we may be able to assist you in attaining them.

Christine Kearney, CRC  
Vice President of Rehabilitation Services
